

How to Create the Choice Activity

The Choice activity allows you to ask a question and set up radio buttons which learners can click to make a selection from a number of possible responses. They can choose one or more option and they can update their selection if you allow them. Choices can be useful as quick poll to stimulate thinking about a topic; to allow the class to vote on a direction for the course, or to gauge progress.

The choice activity module enables a teacher to ask a single question and offer a selection of possible responses.

Choice results may be published after students have answered, after a certain date, or not at all. R
