Introduction

This is a picture of a flower:

In this course, we will be discussing the different colors and shapes of this flower.

The end goal of this course is to understand and memorize every single line, color, shape, texture, light source, and detail of the flower and surrounding grass.

My name is John Doe. I love my wife and children. I am very excited to be your teacher, and I hope that we can learn more about flowers together this semester.

In many courses, teachers want to add an introduction header concerning course content and objectives, as well as a blurb about themselves. This often leads to much of the page being taken up by the header. To reduce the amount of space used, teachers can put the content of the header into an **HTML block**.

Introduction

Content

This is a picture of a flower.

In this course, we will be discussing the different colors and shapes of the flower.
The goal of this course is to understand and memorize every single line, color, shape, texture, light source, and detail of the flower and surrounding grass.
My name is John Doe. I love my wife and children. I am very excited to be your teacher, and I hope that we can learn more about flowers together this semester.

You can title your **HTML block** in the text box to the right of **Block title**. Add the content that you would like to transfer from your header to the text editor next to **Content**. To do this, you may copy and paste from the header into the **HTML block**. Click on **Save changes** at the bottom of the page when you have finished.
